EDUCATION

McGill University
Master of Architecture In Planning
1971

Clemson University
Bachelor of Architecture
1968

Arthur J. Lidsky became president of DLC+A in 1988, and has served as a planning consultant for colleges and universities since 1971. In this time he has participated in several hundred assignments. For the three years prior to his consulting work, he was Assistant Director of Long-range Planning for the Massachusetts Institute of Technology.

Recent campus planning includes work for College of St. Benedict/St. John's University, Clemson University, Cyprus International University, Middle Tennessee State University, St. Lawrence University, The College of Wooster, and Spelman College. Programs for new campuses include the Aga Khan University in Pakistan, The American University in Cairo, Asian University for Women in Bangladesh, University of Botswana in Maun, Botswana and the NYU Abu Dhabi Campus. Space needs assessment include Cornell University and Ohio State.

Arthur has served on facility review panels for the National Science Foundation (NSF); and has been a Principal Investigator for a NSF study that identified an ideal planning process and developed facility standards for secondary school science, math, and technology education programs. He has given lectures, presentations, and invited papers on campus planning at such organizations as SCUP, the Council for Undergraduate Research (CUR), the International Association for College Unions, No Name Facility Conference, Quality Education for Minorities Network (QEM), and the Municipal Art Society of New York. He is a faculty member of Project Kaleidoscope since 1992, and has been the only non-institutional member on the PKAL National Steering Committee.

Through his writing and lectures, Arthur teaches other professionals, college and university administrators, and faculty about planning and the campus planning process. He has taught campus planning as a faculty member of SCUP's Integrated Planning Institute—the three-day workshop is Step 2 of a three-step certificate program. Arthur was a leader in creating the Institute and its curriculum. Six of his most recent articles are:

"FORM follows FUNCTION? Innovations in Education Mean Flexible Building Design," Connection: The Journal of the New England Board of Higher Education, New England Board of Higher Education, Summer 2002.

"A Perspective on Campus Planning," New Directions for Higher Education, Building Robust Learning Environments, Jossey-Bass, Fall 2002.

"The Ever Changing Campus," Facilities Manager, APPA, March 2004.

"Campus Planning without an Academic Plan is not Planning," Dean & Provost, April 2005.

"The Star Architect Experience is Not Always Stellar," The Chronicle of Higher Education, April 2005.

"Master Planning Campuses for Today's Students," College Planning and Management, January 2006.
